SOLAR POWERED  
FLOWER & FIREFLY  
STRING LIGHTS

INTRODUCTION

Solar lights work by using power generated by the solar panel to charge internal batteries. These batteries are then used to power the light. When switched on the lights automatically illuminate at night by using a light sensor. The duration of illumination will depend on the amount of sunlight and therefore charge received by the batteries.

Design may vary.  
This is not a toy. Keep away  
from children and pets.

1

FUNCTION

(AUTO) On  
(OFF) Off  
(FLASH) Flashing

30 LEDs

Outdoor use

No mains required

Rechargeable batteries become less efficient with repeated charge-discharge cycles and the battery capacity reduces. If battery becomes less efficient try boost charging it by leaving in the off position for 3 to 5 sunny days to allow the maximum charge to the battery.

2

FIRST USE

Leave switch in "OFF" position for 2 sunny days.

PERFORMANCE

	Spring	Summer	Autumn	Winter
Light run time	4-6h	6-8h	4-6h	2-4h

POSITION

Position the solar panel to receive the maximum amount of sunlight.

Do not position under bright light as this will prevent the light switching on at night.

3

CHANGE BATTERY

BATTERY SPECIFICATION

1 x 1.2V AA Ni-CD 400mAh battery required (included).

PROBLEM SOLVING

1. Check the solar panel is positioned correctly.
2. Check the battery and boost charge as described.
3. If problems persist contact customer services.
